

Amtrak's Superliner

is
Somethin'
Special

Amtrak

Amtrak is proud of our new Superliners. We've worked diligently to produce a train that satisfies the needs of the modern rail traveler.

With these "high, wide and beautiful" Superliners, Amtrak is ready to show you what train travel is really like. Modern technology has blended with attractive design to create a train that is really "somethin' special!"

Our coach cars give you a mighty view of the landscape. You'll enjoy the scenery in comfortable reclining seats that have leg and foot rests for napping or a restful night's sleep.

Individual drop down trays and overhead lighting provide passengers the opportunity to enjoy a snack, do some work, play a game whenever you have the urge.

The Superliner Dining car is also something Amtrak is very proud to have in service on this route. You'll really enjoy taste-tempting meals served the way you like them in our restaurant on wheels.

Amtrak's Superliner

is
Somethin'
Special

Amtrak

And our sleeping accommodations are "somethin' else!"

Economy Bedroom

Passengers traveling in the economy bedroom can enjoy the spaciousness of wide seating during daylight, and comfortable sleeping accommodations for two at night.

Family Bedroom

Family travel is great on the Superliner. Our family bedroom can easily accommodate two adults and two children with plenty of daytime sitting room, and adult and childrens' beds in the evening.

Toilet facilities for both the Economy Bedroom and the Family Bedroom are located on the lower level of the Superliner.

Deluxe Bedroom

Luxury is the key word. During the day the Deluxe bedroom provides passengers with a large sofa with two individually reclining seats and a reclining swivel easy chair. The Deluxe bedroom also has private toilet facilities.

Special Bedroom

Designed to accommodate handicapped passengers and their companions, the Special bedroom spans the entire width of the Superliner.

Seating and maneuverability are at a maximum . . . and sleeping accommodations have also been specifically designed for travelers having special needs. The private toilet facility in the bedroom meets the needs of a passenger traveling in a wheel chair.

All Bedroom accommodations have ample lighting, window visibility, individual controls for music and room temperature, and a service attendant is assigned to each sleeping car.
