# Introducing Amtrak® Viewliner® Sleeper Cars:

## A New Standard Of Luxury In First Class Travel!

The very first thing that catches your attention is the view from the windows... double rows big enough to flood your room with sunshine in the morning, starlight every night. A fitting showcase for an everchanging scenic panorama visible from nowhere else in the train.

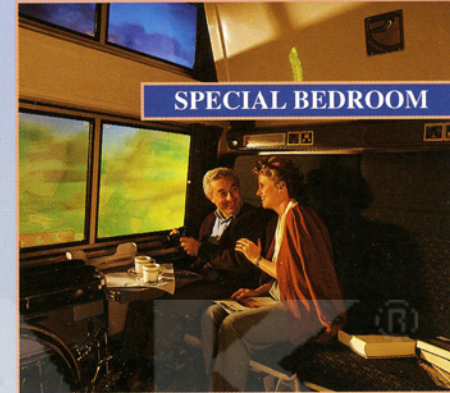

But extra-large windows are just the first of many innovations that make Amtrak® Viewliner® sleeper cars a comfortable and luxurious way to travel the country. Next is the smooth, quiet ride.

The key lies in "modular construction." A design concept that eliminates common walls between rooms, reducing noise and vibration to a mere whisper. Every detail was considered to create an atmosphere of space, light and absolute privacy with state-of-the-art amenities.

You'll enjoy all of these exciting new features plus the comfort and convenience of Amtrak overnight travel.

Our special bedrooms were designed for passengers with special mobility requirements. In addition, a service attendant will be happy to assist you with all of your needs, including complimentary room service, if you wish.

SPECIAL BEDROOM

COMPARTMENT

With enough room for two in every compartment, no one has to fight for the window.

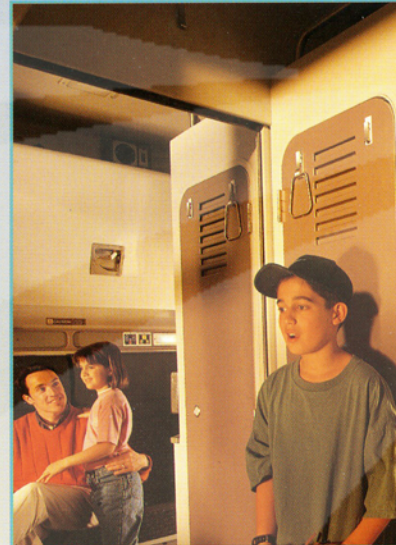

Inside each room, you'll find ample luggage storage, a spacious fold-down table, wide upper beds, individual temperature controls, even a washbasin and commode. All that plus a color video monitor for your viewing pleasure and a musical selection in your room. You'll also find a complimentary beverage center at the end of the car.

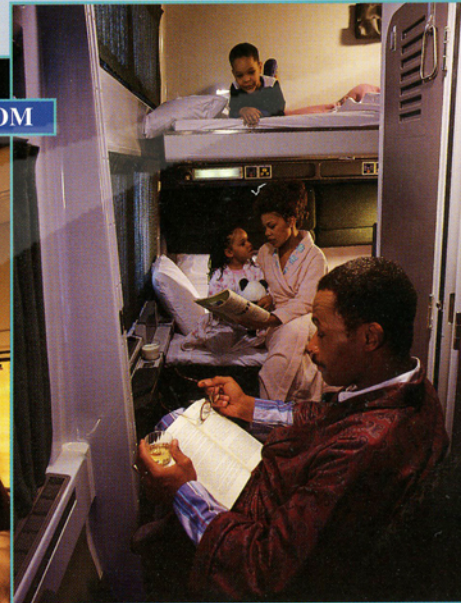

Available to all Viewliner® passengers is a private shower at the end of the car.

Families will appreciate the flexibility to combine our deluxe bedrooms into a suite. This spacious configuration provides two showers, two vanities, two videos... exactly what a family needs to relax.

DELUXE BEDROOM

This is your chance to read, write letters, converse, and escape into a private world of your own — with a spectacular view.

The latest technological innovations have been added to the rooms so you can have fun with game tables, music, videos and more.
